**Do you know of a Somerset County 100% smoke-free restaurant that is not included in this guide?**

**Do you know a Somerset County restaurateur who would like more information on going 100% smoke-free?**

**We want to help!**

**Please call Somerset County CAT at 908-722-4900.**

## Why Smoke-Free?

- “Fresh Air - Fresh Taste”
- To enhance your dining experience, to improve our environment and focus on the flavor of our food products.
- Smoking is the most preventable cause of death in the U.S.
- ETS (Environmental Tobacco Smoke/second-hand smoke) presents serious risks to public health including: increased respiratory illness, triggers asthma in children, heart disease and many forms of cancer.
- To improve personal and public health in our communities.

Somerset County Communities Against Tobacco (CAT) is part of a statewide movement dedicated to enhancing the health, safety, and well-being of our communities through tobacco prevention and education with emphasis on four primary goals:

- 1) Reducing public exposure to ETS,
- 2) Preventing youth initiation of tobacco use,
- 3) Promoting options for quitting and
- 4) Reaching diverse and under-served populations.

CAT members are concerned professionals and citizens who live or work in the county – new members are always welcomed at CAT monthly meetings and community events.

If you are interested in joining the CAT Coalition, contact the Somerset Council on Alcoholism & Drug Dependency, the coordinating agency, at 908-722-4900.

CAT is sponsored by the New Jersey Department of Health and Senior Services, Comprehensive Tobacco Control Program, with funds from the increase in the New Jersey cigarette tax (P.L. 2002, c. 33).

Want to quit or know someone  
who wants to quit?

## Environmental Tobacco Smoke (ETS)

Involuntary or passive smoking is exposure to second-hand tobacco smoke. It is a mixture of exhaled mainstream smoke and side-stream smoke released from smoldering cigarettes or other smoking devices and diluted with ambient air. Involuntary smoking or exposure to ETS involves inhaling carcinogens (cancer-causing agents present in tobacco products) and other toxic components.

Scientific evidence has concluded that there is **no safe level of second-hand smoke** and that it has the same effect on non-smokers as on smokers, causing heart attacks, lung and other cancers, asthma attacks and other breathing problems, particularly in children.

If you wish to voice your concern about ETS in Somerset County, either call **1-800-749-7011** or complete an online version of the county Health Department's ETS complaint form at **[www.co.somerset.nj.us](http://www.co.somerset.nj.us)**. Go to Departments from the homepage, then click on Health.
