

# HOW SAFE IS YOUR CHILD?

Children can be screened for lead at any age!  
There is no safe level of lead exposure.

Have you recently travelled abroad?

Was your home built before 1978?

Do you use cosmetics from other countries?

Do you use homemade herbal medicines or Ayurvedic medications?

Do you cook with spices and foods from other countries?

If you answered YES  
to any of these questions . . .  
talk with your child's provider about  
getting screened for lead!
